APPENDIX

In accordance with 37 C.F.R. § 1.121, claims 1-7 and 9-13 are set forth below in marked-up form to aid the Examiner in identifying amendments to the claims. Additions are <u>underlined</u>, and deletions are shown with bold square brackets and strikethrough text [like this]. If a discrepancy is found between the version of the claims set forth above and the version set forth below, then the version set forth above controls.

1. (Twice Amended) [An amide derivative represented by the general] A compound of formula (I):

$$R^{2} \xrightarrow{\text{II}} Z \xrightarrow{\text{OH}} R^{1a} \xrightarrow{\text{R}} R^{1b} \xrightarrow{\text{N}} X \xrightarrow{\text{B}} (I)$$

in the formula, each of the symbols means as follows:

ring B is a heteroaryl group which is unsubstituted or substituted and is optionally fused with a benzene ring;

X is a bond, or a lower alkylene or an alkenylene, both of which are unsubstituted or substituted with hydroxy or a lower alkyl group, or X is a carbonyl or a group represented by -NH-, and when X is a lower alkylene which is substituted with a lower alkyl group, a carbon atom of the ring B optionally bonds with the lower alkyl group so that a ring is formed;

A is a lower alkylene or a group represented by -lower alkylene-O-;
